Regenerative Aesthetic Medicine

Dr. Giorgio Maullu

REVITALIZE WITHOUT TRANSFORMING

Acquaforte Thalasso&Spa proudly presents Deasalus, a premier destination in Sardinia for Regenerative Aesthetic Medicine. Discover an exclusive retreat dedicated to health, beauty, and overall well-being. Our approach is inspired by the philosophy of regeneration as the new frontier in Aesthetic Medicine: a scientific and medical methodology that rejuvenates through tissue regeneration, allowing you to revitalize without altering your natural essence.

Initial Consultation

Aesthetic Medical Consultation Face €250

Aesthetic Medical Consultation Body

€250

Pain Therapy Consultation €500

Facial Treatments

Resurfacing Viso Laser Frax® 1550nm

€1000

Skin resurfacing, or skin regeneration, is an advanced aesthetic procedure that aims to improve skin texture, reduce imperfections and wrinkles, diminish scars and reveal a more youthful and radiant appearance.

Stem Cell Regeneration – Face

Regenerative Medical Treatment based on the infiltration of autologous stem cells into the face; it restores volume and contrasts slackness, improving skin quality by deeply stimulating cell regeneration. (Single session)

- Stem Cell - Face € 1200
- Stem Cell - Face + Neck € 1900
- Cellule staminali Face/Neck/Decolletage € 2000

CFU Elife

Facial rejuvenation treatment based on the Hi-Fu (High Intensity Focalised Ultrasound) technique, capable of smoothing out the deepest wrinkles on the face and neck in a single session.

- CFU Elife Face € 2500
- CFU Elife Neck € 1800
- CFU Elife Face + Neck € 3000

Bio-revitalisation €450

Mesotherapy medical treatment involving the injection of vitamins and free hyaluronic acid, restoring radiance and

freshness to the face, improving the surface texture.

KARISMA® Bio-revitalisation

Bio-revitalisation is a medical procedure involving the injection of carboxymethylcellulose and hyaluronic acid into the neck, face, décolletage and hands to reduce wrinkles and leave the skin looking brighter, fresher and healthier. (A cycle of 3 sessions is recommended)

- KARISMA® Face/Neck/Decolletage €800
- KARISMA® 2 zones € 1400

Peeling prx- t33 €450

This treatment stimulates the regeneration of the skin by gently exfoliating the horny layer. It removes surface impurities and simultaneously biostimulates the skin. Completely painless and non-invasive, it leaves the area treated looking instantly radiant.

FM5 Sensory® - Photorejuvenation €500

Treatment promoting metabolic activation of fibroblasts compromised by photoaging and photoaging. It acts according to the principles of photobiomodulation, by means of light frequencies generated by sophisticated LEDs featuring the latest electronic technology.

Innovative and effective multisensory technology for photorejuvenation and photobiomodulation treatments and for relaxation from physical and mental stress, characterised by the simultaneous activation of the senses of sight, sound and smell.

Face Mask € 300

Ideal after Peeling, CFU Elife®, FM5 Sensory, for a soothing, decongestant, moisturising and brightening effect. Vitamin C mask with a Botox effect.

Botulinic Toxin - Face € 1000

A pharmaceutical product that smooths out expression lines caused by hypercontraction of the facial muscles. Provides a relaxed and fresher appearance in the upper third of the face with a brighter and more relaxed expression.

Teoxane® Hyaluronic Acid Filler €800

Facial filler treatment based on the differentiated cross-linking of hyaluronic acid to treat hypertrophy of the lip, cheekbone and nose area.

- Underarm € 1000
- Hand € 1200
- Foot € 1200

Injectable PDO €2000

Facial lifting treatment based on polylactic acid capable of restricting the derma and smoothing out even the deepest facial wrinkles.

Pure+ Facial Radiofrequency €600

Non-invasive facial regeneration treatment using exodermal radiofrequency handpieces to smooth and mitigate fine lines and improve facial radiance.

Body Treatments

Hyperhidrosis

Hyperhidrosis is excessive sweating which occurs in various areas of the body, such as the underarms, hands and feet. Botulinic toxin is injected into the area to be treated with the aim of inhibiting the sweat glands without interfering with the physiological process of sweating.

Carboxytherapy

A microneedling technique involving the subcutaneous administration of a known amount of gaseous CO₂. Suitable for the treatment of cellulite, microcirculation complaints, fatty deposits and skin aging.

- Total body € 1000
- Zonal € 450

VelaShape 3 €450

Body shaping treatment that redefines the silhouette and improves microcirculation thanks to a bipolar radiofrequency, vacuum and infrared action.

Cryoliposculpt €1000 (4 zones)

Non-invasive aesthetic medical treatment capable of eliminating localised fatty deposits (hips, thighs, buttocks) through the cryolipolysis of fat cells.

Medisculpt €600

Non-invasive aesthetic medical treatment capable of stimulating muscle hypercontraction with short, quick, repeated electromagnetic impulses (2 sessions a week are recommended).

Lysiwave €1000

Medical treatment using electromagnetic microwaves capable of eliminating cellulite from the very first applications.

CFU Elife Body €2000 per zone

Medical treatment using High Intensity Focalised Ultrasound (Hi-Fu) capable of restoring the skin's elasticity, for an improved tightening effect. Ideal in all cases of skin slackness (abdomen, inner thigh, upper arm).

Hair Treatments

PRP scalp treatment €1000

Regenerative Medical Treatment based on the infiltration of autologous platelet-rich plasma into the scalp to prevent hair loss and stimulate hair regrowth.
